

Team 4 M3V1 Feedback

General notes for all the teams:

- if there is no feedback for a specific section that means that the work done for that section is good
- Note: although V1 of milestones are not graded, penalizations will be applied if I consider that the team submitted poor work or incompleted sections. Those penalizations (if any) will affect negatively your grade in M3V2

Data Definitions	
Functional Requirements	<ul style="list-style-type: none">• Why is “Security Upgrades/Upkeep” in the functional requirements section? I think you guys must review from lectures or slides again the difference between functional and nonfunctional requirements. Please move that section to non-functional requirements
Wireframes	<ul style="list-style-type: none">• This section must be redo entirely as we discussed during the meeting. If I cannot read or see the wireframes, I cannot test the horizontal prototype. Please ask other teams to show you their wireframes so you can have a clear idea how to fix this section. All of them did a great job in this section.
DB architecture	<ul style="list-style-type: none">• ERD: Your aggregation is not correct, what is the point of having an aggregation in this way? Credit card and Bank accounts are already part of the payment type tied up by the ISA relation. Please add a different aggregation (that makes more sense)
